Professional Profile

I completed my bachelors in Psychology in Lebanon University. The skills which I learned over these years are extremely useful. I developed a strong knowledge in understanding the needs of children at different stages of development and understanding the characteristics of these developmental stages.

In addition to my study of early childhood education, I graduated by passing the official exams for the year 2021 with a Bachelor of Educational Sciences.

During the final year of my major, I began to build my practical experience by working in the field of education and teaching starting from the beginning of 2017 at the Al-Mabarrat Charitable Association. I started working at this institution after completing the specified training hours. During the summer break, I contributed to organizing summer clubs for children by participating in preparing entertaining Group games, this was over a period of 4 years during the summer vacations.

After working at Al-Mabarrat Association for 5 years, I moved to work at Tebnine Modern School, teaching the Arabic language.
